Egg

## Status of exporters and supplier :

Most poultry farms and production complexes **do not** have the possibility to export eggs, meanwhile, there is an export permit for a limited number of natural persons and these persons were identified. The cities of **Qom - Tehran - Mashhad - Isfahan** are the cities where most poultry farms are concentrated.

## Export standards :

Normally, for export to Iraq, they use eggs with a shelf life of **3 months**. There is no strict standard for the size of eggs, but cartons weighing more than **23.5 kg** are usually used. In terms of health rules and regulations, eggs produced in Iran do not have any problems for export, of course, health permits are required for export, which is the **responsibility of the supplier**.

## Price and quantity:

According to the investigations, the cost of declaring and taxing the used commercial card is high, so that the price of **domestic** eggs today is \$ (€) per kilo, and the price of **exported** eggs is almost \$: (€) per kilo. Of course, these prices are different based on the expiration date and the place of delivery and the quality of the egg. There are **1025 cartons** in each container, **12 cardboard packs** in each carton, and **30 eggs** in each pack.
